

Post-Graduate Career Outcomes Survey Report

August 2018-May 2019

Introduction:

This report contains information from graduates responding to Gwynedd Mercy University's Career Outcomes Survey for graduating classes in August, 2018, January, 2019 and May, 2019.

Data was gathered from individual graduates, online sources and faculty. These methods of reporting outcome data are in compliance with reporting guidelines established by the National Association of Colleges and Employers (NACE). Information in this survey reflects career outcome results for graduates approximately four to six months after their graduation.

Knowledge Rate:

Defines the percent of graduates for which the institution has reasonable information concerning post-graduation career status.

Methodology:

- Career Development obtained graduate contact and academic information from Institutional Advancement.
- Career Development and Institutional Research created the Post Graduate Survey.
 - https://www.surveymonkey.com/r/58MSKPM_2018-19GradSurv
- Career Development collected and organized data, contacted graduates, researched online sources for information, contacted faculty for graduation information, and composed report.
- Graduates were emailed the survey up to three times to both their GMercyU and personal email accounts approximately two to four months after graduation.
- Phone calls were placed to graduates who did not complete the survey.
- Faculty were contacted for information on graduates who did not complete the survey.
- LinkedIn was used for information on graduates who did not complete the survey.
- Data is organized by all undergraduate degrees and school: Arts and Sciences, Business and Education, Frances M. Maguire School of Nursing and Health Professions, and Graduate and Professional Studies.
