

Career Outcomes Report

August 2017-May 2018; Non-Nursing Majors for Undergraduates and Advanced Degrees

Introduction:

The information in this report is from graduates responding to Gwynedd Mercy University's (GMercyU) Post Graduate Survey for graduation classes August 2017, January 2018 and May 2018. This report contains information on all graduates, excluding nursing majors. A different instrument, EBI/Skyfactor, was used by Institutional Research to survey nursing graduates.

Data was gathered through individual graduates, online sources and faculty. These methods of reporting outcome data is in compliance with the national reporting guidelines established by the National Association of Colleges and Employers (NACE). Information in this survey reflects career outcome results for graduates approximately up to 4-6 months after their graduation.

Career Outcomes Terminology:

This term describes the percentage of graduates that fall into the following categories:

- Employed full time (on average 30 hours or more per week)
- Employed part time (on average less than 30 hours per week)
- Serving in the U.S. military or participating in a volunteer, service program (e.g., Peace Corps)
- Attending continuing education only
- Employed and continuing education at the same time
- Seeking Employment
- Not seeking employment or continuing education at this time

Knowledge Rate:

Defines the percent of graduates for which the institution has reasonable and verifiable information concerning the graduates' post-graduation career activities.

Methodology:

Data was gathered for all graduates who obtained a degree from GMercyU during the designated timeframe.

- Data on graduates was collected from Institutional Advancement.
- The Post Graduate Survey was created by Institutional Research.
https://www.surveymonkey.com/r/392GWKC_2017-2018GradSurvey
- Career Development collected data and wrote report.
- Graduates were emailed the survey to both their GMercyU and personal email accounts approximately 2-3 months after graduation.
- Over approximately 4-6 months, reminder emails were sent to all qualified graduates who did not respond.
- Other sources, including asking faculty and reviewing LinkedIn profiles, were used to collect data.
- Graduates, whose information was unknown, received phone calls.
- Career Outcomes data is organized according to degree type: undergraduate degrees (overall and by GMercyU's three colleges: Arts and Sciences, Business and Education (separated for convenience) and Nursing and Health Professions), Graduate and Professional Studies and advanced degrees (masters/doctoral).

All Undergraduate Degrees:

Summary:
